PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer April 2022 - Present
Independent Consultant | Remote

- Full-Stack Development: Designed and implemented complete web applications from database schema design to responsive Vue.js frontend interfaces.
- System Upgrades: Migrated legacy applications to modern tech stacks with comprehensive testing to ensure zero downtime during transitions.
- Code Modernization: Refactored outdated codebases into maintainable, reusable component architectures improving performance and developer velocity.
- Real-Time Features: Integrated Socket.IO for live data synchronization and instant updates in workspace collaboration tools.
- Client Collaboration: Worked directly with stakeholders to translate business requirements into technical solutions with on-time delivery.

KEY PROJECTS

TurboGraph 2025 - Present
Open-source Rust library for automatic GraphQL API generation from PostgreSQL schemas via schema introspection. Built with async-graphql, supporting generated queries, mutations, filtering, ordering, and pagination. Features request-level transaction configuration for roles, settings, timeouts, and Row-Level Security patterns. Integrates with Axum web framework. Published on crates.io.
